

# Magic Self-drilling Toggle

CODE: ZSM4B

- Cabinets
- Shelving
- Wardrobes
- Handrails
- Pictures
- Mirror
- Lamps
- Heavy hanging baskets
- ...
- Anti-loosening
- Anti-vibration
- Super Heavy-duty

Requires only a 50mm clearance behind drywall.

No Pre-Drilling Required

The specially designed zinc alloy component interlocks with the nylon part, increasing the fixing thickness from 15mm to 30mm using an M4x58mm screw.

Compatible with plasterboard of all thickness, 9mm-18mm.

Patented screw with a shrunk rod and reverse thread prevents ZSM4B and plasterboard damage, ensuring zero failures.

The 54.5mm ZSM4B and M4x58mm screw require only over 50mm space behind the gypsum board.

Wall: 548N (56kg)

\*Displacement < 2mm

Ceiling: 200N (20kg)

\*Recommended Safe Load

Innovative feature  
Press the ZSM4B's metal tip 1-1.5 mm into the plasterboard surface using a screwdriver.

Driving the screw forward and tightening it.

The arrows on the ZSM4B's white head indicate the metal part's direction behind the gypsum board. Align the arrow parallel to the wood strip to avoid it. For closely positioned toggles, ensure arrows are parallel. Use hand screwdrivers for fine-tuning alignment.

**WARNING:** Avoid application on gypsum boards with existing insulation materials.
