Anchoring into Plasterboards. Heavy duty as strap/snap toggles.

13.0mm   1.1mmX2   11.4mm

More contact area with plasterboard, less damage to plasterboard.

Please follow the steps below to install
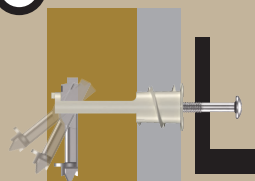

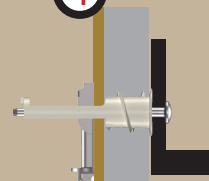

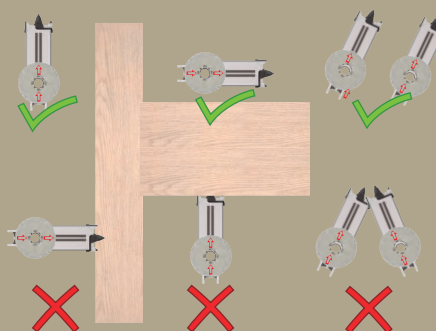

OR

★100% installation success

① Rock wool & Glass wool — Press the ZXLM5's metal tip 1-1.5 mm into the plasterboard surface using a screwdriver.

②
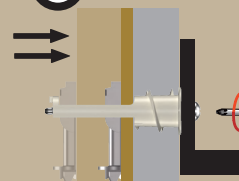

③ Driving the screw forward and tightening it.

④

Applications

The arrows on the ZXLM5's white head indicate the metal part's direction behind the gypsum board. Align the arrow parallel to the wood strip to avoid it. For closely positioned toggles, ensure arrows are parallel. Use hand screwdrivers for fine-tuning alignment.
FRONT Min. 50mm

WARNING: Not suitable for XPS. EPS. FOAM INSWLATED BOARDS.
